

# Destroyed cowl

A highly customizable, extremely simple design. Until you get to the very last row! That's where all the exciting stuff happens.

This scarf can be made with any type of yarn, at almost any size. Scarf width, length, and number of dropped stitches can be adapted easily to suit your preference.

Instructions are for scarf as pictured.

<b>Finished Size</b>	46.5" dia. x 13" w.
<b>Needle Size</b>	8 / 5mm
<b>Yarn Weight</b>	Aran or Worsted
<b>Yarn Quantity</b>	220yds as pictured (approx)
<b>Gauge</b>	4 sts/in.

## 1. Cast On

CO 34sts on scrap yarn (to make kitchener stitch connection later). Working scarf width should be approx. 11".

## 2. Scarf Body

Work stockinette stitch for 46" (or any desired length).

## 3. Last Row

Once desired length is achieved, on the final row (should be knit row):

- › K 2 sts.
- › [Drop 1 stitch, Make 1 Front]\* repeat sequence in brackets 3 times. (M1F stitch helps maintain the total stitch count once a stitch has been dropped and starts unravelling)
- › K 24 sts
- › [Drop 1 stitch, Make 1 Front]\* repeat sequence in brackets 3 times.
- › Knit 2 stitches.

At this point you should have three stitches on each side of the scarf that are beginning to unravel to create open "ladders". Don't let them unravel too far down the scarf until you've made the kitchener stitch connection.

## 4. Connecting The Ends

- › Remove scrap yarn from the cast-on (beginning) edge and load stitches on needle.
- › Join the two live ends with the kitchener stitch.

## 5. Unravel

Once kitchener stitch connection has been made, finish unravelling the six stitches dropped on the last knit row. Stitches should unravel all the way through the kitchener stitch connection, leaving a completely seamless scarf.

Block and wear!
